

REACH YOUR TEAM IN SECONDS

Instant SMS alerts that work for everyone —
no app download or login required

Who is SMS messaging for?

- ✓ Teams looking to enhance safety operations across multiple sites
- ✓ Organizations that need to instantly reach their entire workforce
- ✓ Businesses looking to streamline employee communication

Real-time Alerts

Deliver critical updates to one person or entire groups within seconds. Send safety alerts, event updates, or urgent notifications.

Two-way Messaging

Send messages and receive responses in real time. Recipients can confirm messages, provide updates, or respond to requests.

Targeted Delivery

Reach your entire organization, a specific group or role, or a single individual. Ensure messages are only sent to the right people.

Message Templates

Use existing templates for speed or tailor messages before sending. Communicate quickly while keeping messaging consistent.

Automated Triggers

Automatically get SMS alerts when employees check in or out, enter or exit a location, or are flagged as late or absent.

Multi-Language/MMS

Send messages in multiple languages to support diverse teams. Optional MMS support allows you to include images and media.

Pair with Stratus-io Emergency Headcount

Enhance your emergency preparedness by combining SMS Messaging with Stratus-io

[LEARN MORE](#)
